

To the FCC,I am writing to respectfully urge you to reject the NAB's petition 04-160 and to support Satellite Radio and it's subscribers. I live in a very rural area of West Virginia and without satellite radio we wouldn't have radio at all. It is the same with TV service. Our family must depend on satellite for that as well. It is not just a service that we view as an extra. Satellite radio is our only option, please do not take that away from us. Thank you, The Wilkins Family
